To whom it may concern:

Switching our credit card processing to PayJunction has been an excellent business decision for Braverman Reproductive Immunology. The new technology was simple to implement and was a seamless transition to our busy office. It was easy to install and use card readers as well as the signature pads. Having the patients sign their receipts via email is not only cost effective and time saving, but it allows for a paperless online achieving record to assure accuracy.

The service and support of David Ross and the entire PayJunction staff has been nothing but professional and a pleasure to work with. They genuinely want to be an integral part of the office and work to accommodate in every way possible. I would recommend them to anyone who wants a more efficient way to process cards.

Thank you for implementing the last credit card processing system our office will ever use.

Sincerely,

Judy Lawrence
